PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DLA). The photographic analysis for this particular report was performed by the Production Center 1P1a.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

Ulyanovsk Ammunition Depot East is located in a heavily wooded tract across the river from Ulyanovsk, south of Chasovnya Verkhnyaya, and approximately 6 kilometers (km) east of the Ulyanovsk Railroad Bridge over the Volga River (Figure 1). The installation is double-fenced, surrounded by a fire-break, and covers approximately 1,725 acres. The main storage area contains 69 ammunition storage buildings, 32 miscellaneous storage buildings, 1 probable off-loading building, 1 possible administration building, and 35 miscellaneous support buildings. The administration and support area contains 3 possible administration buildings, 10 probable barracks, 7 storage

buildings, and 26 miscellaneous support buildings. Unidentified construction activity is observed in the southwestern corner of this area. Six sentry towers are located along the perimeter (Figures 2 and 3).

Comparative analysis reveals no significant change in facilities since [] but comparison with target mosaics compiled from World War II photography reveals the construction of 6 additional rail spurs and several probable ammunition storage buildings.
